## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 2-5, 7-12, 14-22, 24-27 and 29-38 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art taken alone or in combination fails to anticipate or fairly suggest the limitations of the claims, in such a manner that a rejection under 35 USC 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 9, 20, 31, 35 and 37.

Specifically regarding claims 9, 20, 31 and 37, Nakatsu et al. (5031991) teaches the state of the art of optical coupling devices.

But, Nakatsu et al. fails to explicitly teach a combination of all the claimed features including the optical beam incident upon the first lens has a first numerical aperture in the first plane of beam propagation; the optical fiber has an acceptance numerical aperture associated therewith; and the first numerical aperture divided by the acceptance numerical aperture is substantially equal to or less than the second focal length divided by the first focal length, as claimed.

Specifically regarding claim 35, Nakatsu et al. (5031991) teaches the state of the art of optical coupling devices.

numerical aperture in the second plane of beam propagation; the optical fiber has an acceptance numerical aperture associated therewith; the first and second focal points of origin are separated by a fourth distance; and the second numerical aperture divided by the acceptance numerical aperture is substantially equal to or less than the second distance divided by the sum of the first focal length and the fourth distance, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
